Although nearly all households in the Cook Islands are connected to grid electricity, only 5.5% of households have additional solar photovoltaic systems installed, and 1% use small diesel generators. Several actions have taken place throughout the islands to increase the uptake of renewable energy.

Compelling reasons to consider buying a solar power system for your home here in the Cook Islands: Abundant Sunlight: The Cook Islands receive consistent sunlight year-round, making solar energy highly effective. Lower Electricity Costs: Reduce your monthly energy bill, leading to significant long-term savings.
