What is the ITC tax credit for solar panels?

Laid out in Section 48 of the U.S. tax code, the ITC for businesses provides an incentive for investing in clean energy -- one of the key incentives is a dollar-for-dollar tax credit based on the cost of your solar panel system. Through the Inflation Reduction Act of 2022, the ITC was set to 30% of the cost of the system, and extended until 2034.

Can I get a tax credit for solar energy?

There are two tax credits available for businesses and other entities like nonprofits and local and tribal governments that purchase solar energy systems (see the Homeowner's Guide to the Federal Tax Credit for Solar Photovoltaics for information for individuals):

How much tax deductible is a solar PV Property?

A solar PV property that commenced construction in 2023 is eligible for a 30% ITC, so when the tax basis is \$1,000,000, the 30% ITC reduces tax liability by \$300,000. In the example, the business uses accelerated depreciation to determine what amount of depreciation it will deduct each year from 2025 to 2030.

Can a business claim the ITC for a solar system?

Though the ITC can be claimed in full for the year in which the solar system is placed in service, the business claiming the ITC must retain ownership of the system until the sixth year of the system's operation, or the business will be required to repay a portion of the tax credit.

Are tax credits driving reshoring of solar jobs?

The combination of billions of dollars of tax credits for new facilities and tougher restrictions on foreign products appears to be driving a wave of so-called reshoring of solar jobs.
