

Who is Terra Energy?

Since established in 2011 as a Mongolian subsidiary of Guildford Coal with its 100% ownership, Terra Energy LLC has aimed to support local communities through preferring local employees and suppliers and keep focusing on developing sustainable cooperation with local communities.

Who manages Myanmar's energy sector?

Myanmar's energy sector is managed by the Ministry of Electric Power (MOEP) and the Ministry of Energy (MOE), which together account for over one-third of public sector revenue. Before May 2022, the two ministries operated under one single Ministry of Electricity and Energy (MOEE).

Does Myanmar have a power supply gap?

Myanmar's power sector will likely continue to experience significant challenges. To sustain the current level of power supply would require adding 300-500 MW every year until 2030. Scenario analysis on the power supply-demand gap illustrates that available generating capacity is projected to not meet the growing demand.

Why are foreign investors leaving the energy sector in Myanmar?

Due to political and economic instability and international sanctions in Myanmar, many foreign investors have left the energy sector. Macroeconomic slowdown and depreciation of the local currency has also put strong pressure on financial performance of the sector.

Can Myanmar revive the development of hydropower and LNG-to-power?

In the longer term, Myanmar can revive the development of hydropower and LNG-to-power, which were planned in the past or were under construction but did not materialize. Political and macroeconomic stability is important to improve investment climate for these options on the ground.

Can power trade and imports help ease power shortages in Myanmar?

While power trade and imports could help ease the electricity supply shortages, it remains challenging under the current political circumstance in Myanmar. Myanmar's power sector continues to record losses due to a combination of several factors, including currency depreciation, increasing grid maintenance cost, and revenue decline.

Energy Catalyst Country Guide: Myanmar 4 The energy sector in Myanmar As of 2019, Myanmar had an installed electricity generation capacity of about 5,700 MW. This is made up of 3,255 MW of hydropower and 2,387 MW of thermal power using gas, oil, and coal, and up to 140 MW in solar power. As of 2017, according to the World Bank,
