The Role of Smart Grids in Gambia's Energy Market Transformation The Gambia, a small West African country, has been grappling with energy challenges for years. With a population of about 2 million people, the country's energy sector has been characterized by frequent power outages, high costs, and a heavy reliance on imported fossil fuels. However, [...]

Yetu is creating smart grids for the next generation! What you see below is a monitored and controlled #iot distribution cabinet. It is a critical part of the smart grid system which...

ICT infrastructure improves there is a large opportunity for a smart grid system to be developed. Companies investing in The Gambia have a domestic market of 1.75 million people but the country's well-developed infrastructure ensures that all major markets, including Senegal's large population of more than 12 million

people, are only a short
