

Who financed Timor-Leste (East Timor) study?

Timor-Leste (East Timor). The study was financed by Asian Development Bank (ADB) under its TA No. 3748-TIM: Preparing the Power Sector Development Plan.

Did East Timor have a low electrification ratio?

Even then, East Timor had the second lowest electrification ratio of Indonesian provinces. The events of 1999 resulted in widespread destruction of almost all power sector assets, including administrative buildings, power stations, power lines, and associated records and documentation.

How much does electricity cost in Timor-Leste?

The flat rates vary from \$3 per month for low-income consumers with a two-amp connection and 6-hour daily provision of power, to \$25 per month for connection above four amps and 24-hour access to power. II. POWER DEMAND AND SOURCES OF ENERGY In 1998, the total peak load of Timor-Leste was reported at 17.1 MW. Power sales stood at

How many households in Timor-Leste have access to electricity?

As noted earlier, only 20% of households in Timor-Leste have access to electricity. The Government intends to address this situation in the decade ahead with a sustained program of rural electrification.

How is power supplied in Timor-Leste?

The district capitals and rural areas are supplied through a cumulative operational capacity of 12.1 MW. There is no transmission grid in Timor-Leste and the highest distribution voltage level is 20 kV. All power generation is based on diesel generation, using automotive diesel oil as fuel.

Which power plants supply most of Timor-Leste's electricity?

Two newly constructed power plants supply most of Timor-Leste's electricity: (i) the 119-megawatt (MW) Hera plant, located near Dili, became operational in 2011; and (ii) the 136 MW Betano plant, located in the Manufahi district on Timor-Leste's south coast, became operational in 2014. This summary is based on ADB. 2014.

Timor-Leste, also known as East Timor, is a small island nation in Southeast Asia. With its stunning beaches, diverse landscapes, and rich cultural heritage, Timor-Leste offers a unique ...

oTimor-Leste Strategic Development Plan 2011-2030: oprovide electricity access to all households by 2030. oNo families in Dili will have to cook with firewood by 2020. oRegulation on Fuel, Biofuel, and Lubricant Quality Standards and Specifications: blending of Biofuel is limited up to a maximum threshold of 20 per cent by volume

Timor-Leste has rapidly expanded electricity access to more than 83 per cent of the population but the country has yet to achieve energy security.<sup>1</sup> Consumer costs, even with government subsidy, remain high and outages are common. In addition, most of Timor-Leste's electricity is generated through costly and polluting diesel generators.

Onshore wind: Potential wind power density (W/m<sup>2</sup>) is shown in the seven classes used by NREL, measured at a height of 100m. The bar chart shows the distribution of the country's land area in each of these classes compared to the global distribution of wind resources. Areas in the third class or above are considered to be a good wind resource.

Increasing climate variability will make irrigation systems and water management critical to Timor-Leste's food production systems. Electricity will be important in powering these systems, as well post-harvest processing in community contexts.
