While the British Virgin Islands relies on imported oil and gasoline for nearly all of its energy and transportation needs there is a wealth of untapped renewable energy resources such as solar, ...

Work has begun on Anegada's Hybrid Renewable Energy & Battery Storage System in the British Virgin Islands (BVI), which, upon completion in November of this year, would harness solar energy to power the island of Anegada. Power52, an American solar energy firm, will manage the project for \$4,687,944.72.

Construction has started on a solar plus storage project on the island of Anegada in the British Virgin Islands for a November 2023 commissioning date. The announcement by the Government of the Virgin Islands on 29 December, 2022, said the project combining solar PV and a battery energy storage system has a combined capacity of 2.1MW.

The Government of the Virgin Islands has signed an agreement for the Anegada Microgrid project, which will introduce renewable solar energy to the island. The agreement was signed through the BVI Electricity Corporation (BVIEC).
