

Tsinghua University - 68 - Offshore Renewable Energy - Integrated Energy System - Battery Energy Storage ... A robust planning model for offshore microgrid considering tidal ...

Different from onshore microgrids, offshore microgrids (OM) are usually abundant in ocean renewable energy (ORE), such as offshore wind, tidal power generation (TPG), etc. Moreover, ...

Transportation, Cost-effective sizing method of Vehicle-to-Building chargers and energy storage systems ...

I am currently an Associate Professor in the Electrical Engineering Department of Tsinghua University. ... Resilience Oriented Planning for Multi-energy Microgrids in an Urban Area. ...

The State Key Laboratory Program, Department of Electrical Engineering, Tsinghua University 2008-2012, Application and Fundamental theory research of Microgrid System. Special Project of National Natural Science Foundation of ...

This paper studies the IHE microgrids planning (IHEMP) under a dynamic perspective. To keep track with the fast development of hydrogen industry, we propose a multistage stochastic ...
