

Who produces electricity in Tunisia?

State power utility company STEG controls 92.1% of the country's installed power production capacity and produces 83.5% of the electricity. The remainder is imported from Algeria and Libya as well as produced by Tunisia's only independent power producer (IPP) Carthage Power Company(CPC),a 471-MW combined-cycle power plant.

What is the power production capacity of Tunisia?

Tunisia has a current power production capacity of 5,547 megawatts(MW) installed in 25 power plants,which produced 19,252 gigawatt hours in 2018. State power utility company STEG controls 91.5% of the country's installed power production capacity and produces 81% of the electricity.

How much of Tunisia's electricity is generated from renewables?

Only 3%of Tunisia's electricity is generated from renewables,including hydroelectric,solar,and wind energy. While STEG continues to resist private investment in the sector,Parliament's 2015 energy law encourages IPPs in the area of renewable energy technologies.

What is the power sector in Tunisia?

Includes a market overview and trade data. Tunisia's power sector is well developed,and nearly the entire population enjoys access to the national electricity grid. Tunisia has a current power production capacity of 5,547 megawatts (MW) installed in 25 power plants,which produced 19,252 gigawatt hours in 2018.

What are Tunisia's energy projects?

One third of the projects will be for wind farms and two thirds for solar photovoltaics. Tunisia's national grid is connected to those of Algeria and Libya which together helped supply about 12% of Tunisia's power consumption in the first half of 2023.

How is power Tunisia funded?

The Power Tunisia Activity is funded through USAIDand made possible by the generosity of the US government and the American People. The author's views expressed on this website do not necessarily reflect the views of the United States Agency for International Development or the United States Government

Through its work, the Power Tunisia program seeks to contribute to the following high-level objectives planned for Tunisia's energy sector: Increase Renewable Energy Deployment; Reduce CO2 Emissions; Reduce Electricity Consumption; Mobilize External Capital in Clean Energy Investments; Engage and Support Tunisian Firms
