

What is Tunisia's energy policy?

However,energy policy puts the emphasis on renewable energy. Electricity generation from wind power strongly increased since 2014. Tunisia mostly relies on gas imports to meet its primary energy needs: almost 97% of its electricity generation came from gas in 2016. However,energy policy puts the emphasis on renewable energy.

Does Tunisia rely on gas?

Tunisia mostly relies on gas importsto meet its primary energy needs: almost 97% of its electricity generation came from gas in 2016. However,energy policy puts the emphasis on renewable energy. Electricity generation from wind power strongly increased since 2014.

What is the energy sector in Tunisia?

The sector also offers opportunities for possible Build-Own-Operate (BOO) or Build-Operate-Transfer (BOT) projects. Much of Tunisia's electricity production comes from gas turbines. Major players in this sector include General Electric (USA), Mitsubishi (Japan), Ansaldo (Italy), and Siemens (Germany).

What are Tunisia's energy projects?

One third of the projects will be for wind farms and two thirds for solar photovoltaics. Tunisia's national grid is connected to those of Algeria and Libya which together helped supply about 12% of Tunisia's power consumption in the first half of 2023.

Who produces electricity in Tunisia?

State power utility company STEG controls 92.1% of the country's installed power production capacity and produces 83.5% of the electricity. The remainder is imported from Algeria and Libya as well as produced by Tunisia's only independent power producer (IPP) Carthage Power Company(CPC),a 471-MW combined-cycle power plant.

Should Tunisia phase out energy subsidies?

Tunisia's energy subsidies have become increasingly costly, averaging 2.1 percent of GDP over the last decade and jumping to 5.3 percent in 2022. Phasing out energy subsidies would help address not only the macro-fiscal crisis but could also improve the energy sector performance and stimulate renewable energy production.
