

Sodium-ion battery technology could be "perfect solution for applications where energy density is not paramount," BMZ Group CEO said. ... research firms, optimisers, investors and IPPs to BYD launching a BESS ...

Chinese EV giant BYD has launched what an executive claimed is the "world's first high-performance" sodium-ion BESS product, using its proprietary form factor Long Blade Battery cell. Synergy completes 800MWh Kwinana BESS in ...

Battery energy storage systems (BESS) were awarded 655.16MW in the UK's T-1 Capacity Market Auction for delivery year 2024/25, which cleared yesterday (20 February) after eight rounds at £35.79 (US\$45.17)/kW/year. ... Industry reacts to BYD's sodium-ion BESS news. Email Newsletter. Email Address Firstname Lastname Company Job Title Company ...

Battery energy storage system (BESS) developer Field has received a £200 million (US\$257.96 million) investment from DIF Capital Partners. Field will use the funds provided by the infrastructure equity fund manager to support the development of its 4.5GWh pipeline of grid-scale BESS projects across the UK and Western Europe.

Chinese automotive company BYD has started construction on new sodium-ion battery facility in Xuzhou, China, CarNewsChina has reported. Being built with an investment of 10bn yuan, the new facility will ...

Its capacity will eventually be doubled to 100MW/200MWh, but is almost certain to already be the largest sodium-ion project in the world, as claimed in both announcements. It ...

As part of the permit extension, Engie agreed to a series of additional fire mitigation measures after the commission raised concerns surrounding the safety of lithium-ion batteries following several high-profile utility-scale BESS fires since the first issuance of the CUP. "Notoriously slow" interconnection process and supply-chain delays

The country's energy storage sector connected 95% more storage to the grid in terms of power capacity in 2023 than the 4GW ACP reported as having been brought online in 2022 in its previous Annual Market ...

W&A is currently working on another large-scale Australian BESS project. Near the site of Eraring, a black coal power plant set to retire in 2025, the energy storage provider is delivering a 460MW BESS for another major utility, Origin Energy. Construction is thought to be underway, after an update in April said the start was "weeks ...

With costs fast declining, sodium-ion batteries look set to dominate the future of long duration energy storage, finds an AI-based analysis that predicts technological breakthroughs based on global patent data.

A render of one of two BESS projects that Evecon and Corsica Sole will build in Estonia. Image: Evecon. Bids have been received by Latvia's grid operator AST for an 80MW/160MWh BESS project while developers Corsica Sole and Everon will build a 200MW system in Estonia, as the Baltic region prepares to decouple from Russia's electricity system in ...

The lithium-ion BESS auction could be held as early as the first half of 2025, the Ministry of Environment and Energy Security said. The auction, and the broader opportunities in Italy's grid-scale market, were discussed at Solar Media's Energy Storage Summit EU 2024 in London in February, with panellists calling the MACSE auction "unlike ...

Large-scale lithium-ion BESS deployments have been few and far between in the UAE but the Middle Eastern nation has been relatively progressive on exploring alternative chemistries at scale. In 2019, Abu Dhabi ...

The noise of battery energy storage system (BESS) technology has "exploded" as a concern in the last six months, an executive from system integrator Wartsila ES& O said. BESS units primarily emit noise from their cooling systems, but balance of system (BOS) components like inverters and transformers also produce noise emissions.

The Anhui Fuyang Wind and Solar Storage Base Project Energy Storage System, for which the company provided the BESS units. Image: Hyperstrong. Hyperstrong, the largest BESS system integrator in China, is ...

The BESS will act as a strategic network node along a transmission line, mimicking the line's injection or absorption of power into the system. That will prevent the need for extra transmission line investment, as well as allow TransnetBW to operate the line's more efficiently. ... BYD launches sodium-ion grid-scale BESS product. Flow ...
