

What is a hybrid solar inverter?

Like regular string solar inverters, hybrid inverters convert solar DC power from strings of solar panels to AC (alternating current) power used to power your home. However, unlike solar inverters, excess solar energy is used to charge a connected battery system or exported to the electricity grid.

Do hybrid inverters need to be connected to solar panels?

Hybrid Inverters do not need to be connected to Solar Panels to function. Our Inverter and Battery Combo includes the Hybrid Inverter and Battery that are compatible with the system to provide you with Electricity during Load Shedding.

What batteries are included in the inverter & battery combo?
