

Who is Tyva energy?

Our assembly capabilities, located in France within an ISO 9001 certified facility, enable us to meet high production volumes. TYVA Energie is a French manufacturer of lithium batteries since 2013. We develop sustainable and modular batteries solutions to answer specific or high efficiency energetic needs.

What can Tyva energy do for You?

Besides building our own sustainable and modular lithium batteries' solutions, TYVA Energie internally develops various technologies for your applications, whether solutions directly integrated into your systems or additional features we place at your disposal.

Why should you choose Tyva energy batteries?

TYVA Energie's batteries have allowed us to create a vehicle at the cutting edge of technology with an innovative green power source. Moreover, it has a great autonomy coupled with a significant lightness thanks to the compactness and the mass energy of their lithium batteries.

Why should you choose Tyva energy ultrion technology?

That is why TYVA Energie has developed Ultrion technology which is suitable with lithium batteries from our Moduloo Ax range. Thus, you can benefit from ultra-fast charging for your applications thanks to last generation cells. A project you want to discuss about?

Why does Tyva energy develop its own electronic cards?

Since it allows control and ensure lithium batteries' safety, it seems essential for us to fit all of our ranges with smart and performing BMS. That is why TYVA Energie develops its own electronic cards designed and configured entirely by our Engineers.

What energy sources are available in Mozambique?

Mozambique has abundant energy sources available for exploitation. As of 2021, the country was ranked first in energy potential of all the countries in the Southern African Power Pool (SAPP), with an estimated energy capacity of 187,000 MW. Available energy sources include coal, hydroelectricity, natural gas, solar energy and wind power.

Created in 2013, French manufacturer of durable, modular lithium batteries for professionals in the robotics, electric mobility, offroad and military sectors. Durable thanks to the TYVA Refill ...

Besides building our own sustainable and modular lithium batteries' solutions, TYVA Energie internally develops various technologies for your applications, whether solutions directly integrated into your systems or additional features we place at your disposal.

We are aware that the lithium battery sector we position ourselves in is complex because of its technicity, newness and constant evolution. That is why TYVA Energie commits towards its customers by accompanying them depending on ...

Created in 2013, French manufacturer of durable, modular lithium batteries for professionals in the robotics, electric mobility, offroad and military sectors. Durable thanks to the TYVA Refill reconditioning solution, which gives batteries an infinite lifespan.

Mozambique has abundant energy sources available for exploitation. As of 2021, the country was ranked first in energy potential of all the countries in the Southern African Power Pool (SAPP), with an estimated energy capacity of 187,000 MW.

We are aware that the lithium battery sector we position ourselves in is complex because of its technicity, newness and constant evolution. That is why TYVA Energie commits towards its customers by accompanying them depending on their needs through training sessions intended for professionals.

With more than 13 years of experience in industrial battery development and manufacturing, the TYVA ENERGIE group, through its subsidiaries, offers TYVA LITHIUM, a customized Li-Ion battery, with TYVA MODULOO, an innovative, 3D modular and ecological Li-ion battery.
