

Explore the rise of wind-solar hybrids, geographic concentrations, and the transformative potential of floating solar, as Türkiye allocates 2.4 GW of hybrid capacity in three years, signaling a revolutionary chapter in the nation's clean energy journey.

Aydem Renewables has commissioned the Usak Hybrid SPP, Turkey's largest hybrid solar power plant (SPP) with a capacity of 82.15 MW. Usak Hybrid SPP, where 155 thousand double-faced panels that are 20 ...

This analysis examines the installed capacity, project pipeline and allocated grid capacity of hybrid solar power plants in Türkiye at the end of 2023. Explore monthly hybrid solar capacity data in our Türkiye electricity data tool.

As of the end of 2023, solar was the secondary source for all 240 operational and planned hybrid power plants in Türkiye. As part of a hybrid plant, solar provides extra power generation and reduces infrastructure costs, ...

As of the end of 2023, solar was the secondary source for all 240 operational and planned hybrid power plants in Türkiye. As part of a hybrid plant, solar provides extra power generation and reduces infrastructure costs, as it connects to the grid from the same point as the primary source.

By mixing wind and solar power, along with trying out new ideas such as floating solar panels, Türkiye isn't just trying to hit its energy goals. It's also creating an example for sustainable energy around the globe.

ASUNIM Chairman of the Board of Directors Umut Gürbüz stated that they will realize the biggest hybrid projects of Turkey to date, which include two separate power plants at the same time, in terms of being full EPC, and added that "this ...

By mixing wind and solar power, along with trying out new ideas such as floating solar panels, Türkiye isn't just trying to hit its energy goals. It's also creating an example for ...

ASUNIM Chairman of the Board of Directors Umut Gürbüz stated that they will realize the biggest hybrid projects of Turkey to date, which include two separate power plants at the same time, in terms of being full EPC, and added that "this project we have signed has great importance for us."

As the leading company of Türkiye in renewable energy, we have commissioned the Usak Hybrid SPP, the largest hybrid solar power plant (SPP) of Türkiye with a capacity of 82.15 MW.

Aydem Renewables has commissioned the Usak Hybrid SPP, Turkey's largest hybrid solar power plant (SPP)

with a capacity of 82.15 MW. Usak Hybrid SPP, where 155 thousand double-faced panels that are 20 percent more efficient than standard panels have been used, will provide maximum performance, especially in winter, by generating energy even ...

According to data from Turkey's Energy Market Regulatory Authority, the installed solar capacity in Turkey has reached 12.2GW, with 510MW of solar capacity being added through hybrid projects nationwide.
