

What risks do lenders face when financing a Bess project?

The complexity and uncertainty associated with modelling these revenues forms one of the key risks for lenders when considering financing a BESS project on a pure or majority merchant basis.

Can a Bess project be financed on a merchant basis?

Although merchant BESS projects are not a new phenomenon, the debt financing of a standalone BESS project in a wholly merchant market marks a watershed moment. Whilst the EnerSmart projects are fully merchant, there has been an increasing trend emerging for BESS projects to be financed at least in part on a merchant basis.

Will a Bess project increase the number of fully merchant storage projects?

As the energy storage market evolves and lenders become more comfortable with the risks of financing a merchant market BESS project and the AI software that ultimately underpins the optimization of these projects, we expect that there will be a significant increase in the number of fully merchant storage projects coming online.

How to maximize revenue from a merchant Bess project?

In layman terms, in order to maximize revenue from a merchant BESS project, an operator must buy electricity (and charge the BESS) during the lowest priced hours and sell during the highest priced hours each day on the relevant market.

What is a merchant Bess project?

Merchant BESS projects operate in the wholesale market, generating all or most of their revenue from the merchant market.

What does Bess stand for?

ReNew Power awarded the new JV an initial order for a 150 MWh battery energy storage system (BESS) for its 300 MW utility solar Peak Power Project in Karnataka. The new JV is aiming to offer BESS to varied customers including engineering, procurement, and construction and asset management companies.
