Kūpono is designed to become a 131-acre (53 ha) solar farm with 42 MW/168 MWh of lithium-ion battery storage. The JV partners will build the facilities at the Joint Base Pearl Harbor-Hickam West Loch Annex on the island of Oahu. The land for the project was leased from the US Navy under a 37-year agreement.

Ameresco Sunel Energy has commenced construction on the portfolio of multiple solar photovoltaic (PV) park projects of renewable energy producer Sonnedix in the UK.. Appointed as the design-build partner for the project, Ameresco is a joint venture between US-based renewable energy asset developer Ameresco and international contractor Sunel Group.

Firm renewable, solar and storage installation to provide clean energy to Hawaii and boost grid reliability; Over 111MW to be added to Ameresco's Energy Assets in Development; Continues Ameresco's track record of growing its renewable ...

The SMA Sunny Island 4548-US and 6048-US inverters are based on the proven off-grid technology in the Sunny Island 5048-US but now feature 20 percent more power output. A maximum efficiency of 96 percent ensures peak production, which results in reduced diesel usage and makes a smaller dimensioning of the PV array possible.

As the largest solar and BESS facility on the island, Kūpono Solar is designed to deliver 42 MW of clean, renewable energy to the local grid. Ameresco owns and operates the facility, sited on approximately 131 acres of land at Joint Base Pearl Harbor-Hickam, in a ...

Using financial technologies, it helps landowners and communities profit from solar farms. The platform connects investors with solar projects, from commercial and community solar farms to utility-scale installations, promoting clean energy, sustainable agriculture, poverty reduction, and ...

This case study from Ameresco explains how the company partnered with Hawaiian Electric (HECO), the U.S. Navy, and the community to develop the Kūpono Solar Project, which addresses the growing need for energy security on the island of O"ahu.

In 2021, Ameresco and Bright Canyon established a joint venture known as Kuponu Solar Development Company, LLC to partner together to advance the Kuponu Solar Project. This is the first project for the joint venture to focus on renewable energy, energy security and resiliency on O'ahu.

MRP currently operates ten natural gas-fired power plants across the US. Of these, eight are located in California. The company is developing a further 12 projects and has previously concluded two development projects in the state: a solar plus storage facility and a stand-alone storage project co-located with a geothermal plant.

FRAMINGHAM, MA and O'AHU, HI - May 29, 2024 - Ameresco, Inc., (NYSE: AMRC), a leading cleantech integrator specializing in energy efficiency and renewable energy, today announced its Kuponu Solar project in Hawaii has been recognized with the prestigious SEAL Environmental Initiatives Award. This esteemed accolade, presented by SEAL ...

Ameresco has selected US-based company Mission Solar Energy for the production and delivery of more than 54.2MW of Buy-American compliant solar modules to be used in the JBSA infrastructure project. Construction on the project is scheduled to begin later this year and is slated for completion in mid-2021.

Models: 3000VA, 5000VA The all-in-one solar power solution The Victron EasySolar-II GX integrates the following elements: A MultiPlus-II inverter/charger A SmartSolar MPPT -Tr solar charge controller A GX device with a 2 x 16-character display.

Ameresco was awarded two clean energy facilities located on the island of O'ahu. The Pu'uloa Energy installation is designed to generate 99 megawatts (MW) of firm renewable power leveraging clean fuels including biodiesel and biogas fuels.
