

The solar-plus-storage system is expected to fulfill 30% of the islands' energy consumption needs. According to the Department of Energy (DOE), the U.S. Virgin Islands have heavily relied on fossil fuels to generate electricity in the past. This means residents accrued expensive electricity costs that fluctuated with global oil prices.

The Virgin Islands SFA Program has the power to transform USVI's residential energy landscape, addressing residents' high electricity costs while creating new opportunities for energy resilience and reliable, affordable, clean power for communities most in need.

The Virgin Islands Water and Power Authority recently announced that Schneider Regional Medical Center on St. Thomas will receive a backup battery system, made possible through a grant WAPA secured from the U.S. Department of ...

The Virgin Islands SFA Program has the power to transform USVI's residential energy landscape, addressing residents' high electricity costs while creating new opportunities for energy resilience and reliable, affordable, clean power for ...

Honeywell Process Solutions has announced plans to install about 124 MWh of its battery energy storage systems alongside 140 MW of solar at six sites to help the US Virgin Islands cover 30%...

U.S. VIRGIN ISLANDS - September 10, 2024 - The Virgin Islands Water and Power Authority ("WAPA" or the "Authority") had the honor today of welcoming representatives from both the legislative and executive branches to tour its newly commissioned Battery Energy Storage System (BESS) at the Randolph Harley Power Plant (RHPP) on St. Thomas. . Attendees included ...
