This study aimed to analyzing grid-connected solar PV in Uganda for viability by evaluating the performance ratio of the already-installed solar systems, and how flexible is the grid to accommodate more power from solar.

The review indicated that, for Uganda, rising energy demand and access, need to reduce carbon footprint, lack of grid extension to rural communities, and improved livelihoods by productive uses...

The Soroti solar power plant is the first grid-connected solar plant in Uganda and, at the time of its commissioning in December 2016, it was the largest solar power plant in East ...

Our analysis offers insights on the challenges Uganda must address to achieve the potential associated with solar mini-grids and multi-scalar solar energy transitions to ...

Most of the solar energy users have installed solar panels in their homesteads hence no need for power transmission. However, with the increased projects in solar energy production by the ...

The review indicated that, for Uganda, rising energy demand and access, need to reduce carbon footprint, lack of grid extension to rural communities, and improved livelihoods by productive ...
