Rebuilding Irpin School with solar. On 25 November 2022, the BSW launched their "Solar Aid" campaign which aims to aid the reconstruction of schools in Ukraine. They began by installing a solar power system with a battery storage unit at School 17 in Irpin. The PV system was financed entirely out of donations from the German solar industry.

Germany has capitalised on solar PV's growth. According to GlobalData, in 2014, solar PV made up 20% of its power mix, with fossil fuels (coal, oil and gas) dominating at 43% and wind at 21%. In 2023, solar PV surpassed fossil fuels, accounting for 33% of power capacity compared to the latter's 30% and 28% for wind.

The deal, announced at the Ukraine Recovery Conference in Berlin, will strengthen EBRD's relationship with the GOLDBECK SOLAR Group, an experienced German solar energy company with more than two decades of experience in the sector and with active operations in over 12 countries.

Goldbeck Solar -- a German firm -- intends to develop up to 500 MW of new solar power in Ukraine in collaboration with the EBRD within the next three to five years. The project will be executed through the joint venture ...

Eventually, the company's engineers developed the hardware and software solutions that enabled us to introduce the unique for Ukraine sun tracking systems - solar trackers. Currently, the company is a developer and manufacturer of a full range of single- and double-axis solar trackers of 5 - 140 kW installed capacity.
