

Who is unigrid battery?

SAN DIEGO, Dec. 19, 2023 /PRNewswire/-- UNIGRID Battery, a University of California, San Diego spin-off startup company, announces that it has received its first commercial MWh-scale purchase orders for their advanced sodium ion batteries.

Are unigrid batteries safe?

UNIGRID's sodium-ion batteries are unlike any other. Built in safety. For peace of mind. Third-party tested for safety, you will not find a safer sodium-ion battery with comparable performance. Our sodium-ion batteries do not undergo thermal runaway.

What is unigrid's sodium-ion battery technology?

Discover UNIGRID's sodium-ion battery technology that combines safety, performance, and sustainability. Our innovative batteries use abundant resources to deliver efficient and powerful energy storage solutions for a cleaner, safer world. Learn more and take the Sodium-Ion Challenge today!

Are unigrid sodium-ion batteries safe?

Take the Sodium-Ion Challenge. For a cleaner, safer world. The world needs clean, safe, easily accessible, and affordable energy storage. We've cracked the code on a solution: UNIGRID's sodium-ion batteries, which use abundant resources, are lower-cost, safer, and just as powerful as any other battery. Why UNIGRID's sodium-ion batteries?

Are unigrid batteries a "drop-in" solution?

UNIGRID batteries are a true "drop-in" solution. We use the same cylindrical and prismatic form factor as lithium-ion batteries, making a switch to our smarter, safer sodium-ion batteries seamless. Test the power of UNIGRID for yourself. Take the Sodium-Ion Challenge.

Will unigrid deliver advanced sodium ion batteries in 2024?

Erik A. Wu, CTO of UNIGRID. Third party testing and validation on the advanced sodium ion batteries has been completed, and UNIGRID is on track to deliver MWh quantities of its advanced sodium ion batteries to customers in 2024.

UNIGRID's unique approach, the use of a tin anode instead of hard carbon, is a breakthrough for sodium-ion batteries; it increases the volumetric energy density to be competitive with and even...

UNIGRID Battery, a San Diego-based startup developing advanced sodium-ion batteries, has announced a successful close of an oversubscribed \$12 Million Series A funding round. The financing was Co-led ...

UNIGRID Battery is developing Sodium Metal-alloy Batteries (SMBs) for grid-scale, long-duration energy

storage applications, at a projected levelized cost of storage (LCOS) of 3.9 cents/kWh/cycle. The current state-of-the-art lithium-ion batteries (LIBs) are both too costly and hazardous for widespread adoption in the grid, and in addition ...

UNIGRID Battery, a San Diego-based startup focusing on advanced sodium-ion batteries, has successfully closed an oversubscribed \$12 million Series A funding round. The financing was co-led by Transition VC and Ritz Venture Capital.

Discover UNIGRID's sodium-ion battery technology that combines safety, performance, and sustainability. Our innovative batteries use abundant resources to deliver efficient and powerful energy storage solutions for a cleaner, safer world.

UNIGRID Battery, a startup spin-off from the University of California, San Diego, announces that it has received the first commercial MWh-scale orders for its advanced tin-electrode sodium ion batteries. The company ...

UNIGRID Battery, a startup spin-off from the University of California, San Diego, announces that it has received the first commercial MWh-scale orders for its advanced tin-electrode sodium ion batteries. The company was founded in 2021 by the innovative research work of Doctors Tan and Wu.

UNIGRID Battery, a spin-off from the University of California, San Diego, has achieved a significant milestone by receiving its first commercial MWh-scale purchase orders for their advanced sodium-ion batteries. Founded in 2021, the company is rooted in the pioneering Ph.D. research of Dr. Darren H. S. Tan and Dr. Erik A. Wu, under the guidance ...

UNIGRID Battery, a San Diego-based startup developing advanced sodium-ion batteries, has announced a successful close of an oversubscribed \$12 Million Series A funding round. The financing was Co-led by Transition VC and Ritz Venture Capital and joined by new investor Union Square Ventures and existing investor Foothill Ventures.

This collaboration combines Unigrid's energy-dense, safe sodium-ion battery chemistry that is free of critical and rare materials, and Nascent's expertise in battery management system (BMS) and energy storage system (ESS) integration.
