

How did GE become a company?

General Electric was formed through the 1892 merger of Edison General Electric Company and Thomson-Houston Electric Company with the support of Drexel, Morgan & Co. The original plants of both companies continue to operate under the GE banner to this day.

Who is GE Power Systems?

GE Power Systems was a division of General Electric operating as supplier of power generation technology, energy services and energy management and also included oil and gas, distributed power and energy rental related solutions. The unit was based originally in Schenectady, NY and relocated to Atlanta, GA in 2000.

Is GEC a UK company?

GEC is heavily involved in operations outside the United Kingdom, deriving only slightly less than half of its revenues from its overseas business. Not all of that revenue, of course, is derived from exporting products manufactured in the United Kingdom.

How is GEC different from GE?

The company differs from its American counterpart not only in size, but also in its range of business. GEC is also more heavily involved outside its home country than GE. GEC's future looks very bright, since its high-tech products continue to see significant growth.

Is GE a publicly traded company?

As a publicly traded company on the New York Stock Exchange, GE stock was one of the 30 components of the Dow Jones Industrial Average from 1907 to 2018, the longest continuous presence of any company on the index, and during this time the only company that was part of the original Dow Jones Industrial Index created in 1896.

When did GEC start?

In 1921, a new purpose-built company headquarters (Magnet House) was opened in Kingsway, London; two years later, GEC's industrial research laboratories at Wembley (later named the Hirst Research Centre) also opened. In the 1920s, the company was heavily involved in the creation and roll-out of Britain's National Grid.
