From initial feasibility studies to project management and installation, our team of experts ensures seamless execution and optimal performance of your solar project, delivering on time and ...

This can damage the transformers. Shunt reactors are used for compensating capacitive VARS which are generated by high voltage transmission lines. This is done in light loaded conditions inorder to avoid over voltage. Hence shunt reactors play a pivotal role in stabilizing network systems and also increasing grid efficiency.

Company profile for solar panel and Component manufacturer Su-urja Solar Systems Private Limited (Staxxa Solar) - showing the company"s contact details and offerings. ...
