

Who is fervo energy?

Fervo Energy is an energy resource company focused on harnessing heat through enhanced geothermal systems (EGS). It was co-founded in 2017 by Tim Latimer, a mechanical engineer who worked as a drilling engineer at BHP until 2015.

Does fervo Energy drilled a geothermal well?

In this paper we present the geology, temperature, stress field, and drilling results from the first five wells drilled at Fervo Energy's (Fervo) Project Cape next-generation geothermal project at Milford Valley, Utah.

What is fervo energy doing at project Cape?

Fervo Energy (Fervo) has completed the drilling of the first deep geothermal wells at Project Cape, including a vertical observation well to 9,844 ft and four 13,000+ft-MD horizontal wells drilled in a 'wine rack' pattern with 5,000 ft laterals at vertical depths of 8150-8550 ft.

What is fervo doing to speed up geothermal development?

Fervo's efforts are part of a broader move to speed up geothermal resource discovery and utilization, supported by the U.S. Department of the Interior's recent policies aimed at accelerating geothermal energy development.

Is fervo a geothermal company?

Across all operations, Fervo maintains a strict commitment to environmental health and safety and robust community engagement. Utah is home to immense geothermal potential. Researchers estimate that the southwest portion of the state contains more than 10 GW of high-quality geothermal reserves.

What is fervo energy's project Red?

Fervo Energy's full-scale commercial pilot, Project Red, in northern Nevada. Geothermal startup Fervo Energy announced a key technical milestone on Tuesday, paving the way for geothermal energy to play a bigger role in the transition to clean energy. Fervo drills deep wells and pumps water into them.

Fervo's Mission is to use innovation in geoscience to accelerate the world's transition to sustainable energy. To accomplish that goal, Fervo has developed groundbreaking technology solutions that have advanced the state-of-the-art of geothermal energy decades ahead of schedule, including the world's most successful commercial enhanced geothermal system ...

Fervo Energy announced the results from their "Project Red" pilot in northern Nevada (Norbeck and Latimer, 2023; Ma, 2023). The results are spectacular. For nearly 50 years, the goal of Enhanced Geothermal Systems (aka, Hot Dry Rock) has been to convert low permeability, hot formations into economically viable geothermal reservoirs (Murphy et al., ...

Fervo Energy is at the forefront of next-generation geothermal technology, aiming to provide 24/7 carbon-free energy. The company has significantly advanced geothermal energy development by ...

BEAVER COUNTY, Utah (September 25, 2023) -- Fervo Energy ("Fervo"), the leader in next-generation geothermal technology, today held a groundbreaking ceremony to mark the start of its exploration drilling campaign at Cape Station, a next-generation geothermal energy project set to deliver 400 MW of 24/7 carbon-free electricity. Cape Station ...

Reservoir Engineer Sydni Tomblin monitors Fervo's geothermal systems by analyzing data and testing wells to improve performance. Working cross-functionally with other departments, she helps make decisions for future planning to continuously improve Fervo's technology. How does your position at Fervo differ from other roles you've held previously? I have a background in ...

How Fervo Energy is tapping into the boundless source of energy beneath our feet. Houston's Fervo Energy will use its innovative geothermal technology to provide clean power to 350,000 homes ...

Page 2/3

of 38 investors who have invested in Fervo Energy. Who are Fervo Energy's competitors? Apex Clean Energy, Terra-Gen, NextEra Energy Resources, Cogentrix Energy, and Calpine are some of the 7 competitors of Fervo Energy.

In this paper we present the geology, temperature, stress field, and drilling results from the first five wells drilled at Fervo Energy's (Fervo) Project Cape next-generation geothermal project at ...

"At a time when emission reductions are vital, energy demand has surged to a record high as a boom in AI and data centers pushes our nation's grid to the brink," writes Tom Steyer, co-#173;executive chair of Galvanize Climate Solutions, which invests in Fervo Energy, in a Time article. "Leveraging multiple forms of renewable energy will be ...

The Asset Reservoir Engineer will be responsible for providing reservoir engineering analysis to support Fervo Energy's geothermal development activities. This position will play a key role in shaping the development strategy, evaluating reservoir performance, and improving capital efficiency across Fervo's growing project portfolio. Responsibilities will include asset ...
