SOLAR PRO. Venezuela whole home backup generator

How much power do you need for a home backup generator?

You will likely need at minimum a 10,000 Wattor 10kW generator to power a whole house. There are portable generators, that are cheaper than stationary home backup generators, in the 10,000 and 15,000 watt range. But likely, if you want a true home backup generator system, you will want a stationary generator in the 16,000kW and higher range.

Can a whole-house generator save you money?

You might have also had to repair frozen and burst pipes,or an unpowered sump pump might have led to a flooded,moldy basement. Those costs can be avoided if you have a whole-house generator. In fact,savings from a single outage can more than recoup your investment in a home generator.

How much does a whole house generator cost?

But there are downsides. Whole-house generators cost more than portables. They can range in price from \$2,000 to \$7,000. By comparison, large portable generators that power a whole house start at around \$1,000. They're large in size and require a level concrete pad outside your home, a bit like a central air conditioning unit.

Is a whole-house generator better than a portable generator?

Learn more. Whole-house generators are more expensive than portables, but they provide convenient backup power, allowing you to get through outages and weather emergencies with less trouble.

Why do you need a whole-house generator?

If you often lose power where you live, because of storms or other problems with the electrical grid, having a whole-house generator ensures that your appliances are available when you need them, even hardwired devices like your well pump, water heater, and air conditioning and heating systems.
