What are the best solar rain barrel pumps?

Let's take a quick look at our top three solar rain barrel pumps. Best Overall If your main purpose behind the implementation of a pump is purely water pumping, then Solariver Solar Water Pump is the best choice. This kit can efficiently pump water for your ponds, gardens, rainwater collection, and greenhouses.

Are rain barrels a good way to collect rainwater?

Rain barrels are a great way to harvest rain water and fairly easy to DIY. But why stop at one rain barrel, when you could maximize your water storage in a small space by stacking multiple barrels!? This Hubby How To shows the building process of a 3 Tier Rain Barrel System to collect rainwater from the gutter.

How do I choose a rain barrel?

Select the appropriate rain barrel. Pick one that meets your needs in terms of size and location. Take into account your area's rainfall levels and the size of your garden. Obviously, a larger barrel holds more water, but it is also bulkier, harder to maneuver, and occupies more space. We used a 50 gallon flat-back barrel.

Can a blue barrel rainwater catchment system™ be used vertically?

The quick answer is yes. But there's a but. A big one. This isn't an approach we'd recommend. Do you know why? Read on! While the Blue Barrel Rainwater Catchment System (TM) in its classic form consists of one long line of barrels (you choose how many), some people have vertical space they want to utilize.

How do you store rain barrels?

Chaining multiple rain barrels is a great way to increase storage. You can either connect them side by side on the ground or stack the barrels vertically. Both options require some additional fasteners and piping to create a combined system. We prefer the stacked rain barrel system for better water pressure.
