

What is solar photovoltaic (PV) power generation?

Solar photovoltaic (PV) power generation is the process of converting energy from the sun into electricity using solar panels. Solar panels, also called PV panels, are combined into arrays in a PV system. PV systems can also be installed in grid-connected or off-grid (stand-alone) configurations.

How do you install a solar system?

Once the solar panels are installed, the system needs to be activated. This involves interconnecting the solar panels, installing the inverter, and commissioning the system. During this step, installers should note that as long as the solar panels are receiving sunlight, they have an open circuit voltage.

Should you install a solar PV system in a low electricity rate?

However, homeowners in areas with lower electricity rates may still benefit from the installation of a solar PV system depending on the peak sun hours and available incentives in the area. Most homeowners opt for a rooftop solar installation to maximize their exposure to daily sunlight.

Can I install my own solar panels?

Although DIY options are available, hiring a professional solar company is best to ensure your panels are correctly and safely installed. Yes, it's possible to install your own solar panels. However, DIY installations require electrical skills and advanced knowledge of solar energy that most DIYers don't have.

Should you choose a solar photovoltaic system?

Solar photovoltaic (PV) systems have become an increasingly popular choice for those looking to reduce their carbon footprint and save money on energy bills. Before choosing a new system, homeowners should know how a roof can impact options, the best ways to connect the panels, and more.

How do I prepare for a solar panel installation?

Installing solar panels helps homeowners save money and invest in cleaner energy. To prepare for an installation, determine your energy needs and home compatibility with a solar panel system. The installation requires complicated electrical work and paperwork that any reliable solar installer can handle.
