

The latter installation of 2,400 PV panels was completed in 2008. In total, the "green" interventions at Vatican City have saved 305 tons of carbon dioxide emissions. "Solar energy has unlimited possibilities," said Cardinal Giovanni Lajolo, President of the Governatorate of Vatican City State.

The Vatican goes green: Pope announces new solar plant to power Vatican City Pope Francis waves during his weekly general audience in the St. Peter's Square at the Vatican, Wednesday, June 26, 2024.

With the Encyclical Letter *Laudato Si'* on Care for Our Common Home of 24 May 2015, I invited all of humanity to become aware of the need to make changes to lifestyles, production and consumption, in order to counteract global warming, which has a pervasive use of fossil fuels as one of its main causes.. On 6 July 2022, the Permanent Observer to the UN ...

The Head of the Catholic Church and Sovereign of the Vatican City State, Pope Francis has given his seal of approval to an agrivoltaic plant to ensure complete energy sustenance of the city state. The project will ensure the electricity supply of an existing radio station on site within the extraterritorial area of Santa Maria di Galeria.

Providing for the energy requirements of Vatican Radio and making a contribution to the overall energy maintenance of Vatican City State are the goals of the new plant. Additionally, the two bishops have been appointed as "Extraordinary Commissioners" by the Holy Father through the "motu proprio." They are granted full authority to oversee the ...

Pope Francis has initiated the construction of an agrivoltaic plant within the extraterritorial area of Santa Maria di Galeria to provide energy for Vatican City. In his Apostolic Letter titled "Fratello Sole" (Brother Sun), the Pontiff emphasizes the critical role of solar energy in addressing environmental challenges, echoing themes from ...

However, the city's solar installations, which include solar panels installed on the rooftop of Paul VI's conference hall, mean that the city can now generate enough energy to power all of its ...

Pope Francis has renewables on his mind as he says he wants Vatican City to run on solar power. To achieve his aim, solar panels will be installed on a Vatican-owned property outside Rome.

VATICAN CITY (Reuters) - And then there was light -- and it was powered by the sun. The Vatican on Wednesday activated a new solar energy system and announced an ambitious plan that could one day ...

This project will make the smallest country by land mass entirely energy independent, with all of its electricity

needs met by solar power. Once completed, Vatican City will join Nepal, Paraguay, Ethiopia, Albania, Bhutan, Iceland and Congo as countries that generate more than 99.7% of their electricity from renewables.

Providing energy for Vatican City State. The agrivoltaic plant will make use of the Holy See's property at Santa Maria di Galeria. Located on the edge of Rome, the 424-hectare site houses the transmission facilities for Vatican Radio, thanks to a 1951 agreement between the Holy See and the Italian State.
