

The Eleo battery packs address a notable gap in the off-highway market. They enable simple, practical, and fast integration to support off-highway OEMs in electrifying their entire product line with the same range of ...

Eleo, a Yanmar company, has unveiled a range of battery packs that it said are tailored to the specific requirements of low-volume, high-diversity off-highway vehicles and equipment. Engineered for use in demanding environments, the battery packs are tested to withstand the dust, shock, vibration and water such vehicles and equipment encounter.

The company brought the first battery systems to market in 2020 and now wants to expand across Europe. With a new name, ELEO, and a multi-million euros investment from the Lumipol Group from Heeze, the company is ready for European expansion.

Eleo is the off-highway EV battery pack specialist, our battery packs offer versatile configurations for simple, practical, and fast integration. Battery Packs Applications show submenu for "Applications"

ELEO's modular battery technology offers a superior energy density while the flexible design enables the module length to be easily increased without any additional engineering. The modules are easily scalable in any orientation and direction to reach desired voltage and capacity.

To deliver customers optimal battery performance, ELEO has developed and integrated advanced technology into its new battery system. State-of-the-art cylindrical cells in combination with optimal packing flexibility enable an industry-leading energy density and maximum autonomy. Additionally, ELEO's unique flexible approach is enabled by its
