

The CWT Mega Logistics hub in Singapore serves as a premier integrated warehouse and depot facility. It stands out as one of Singapore's pioneering logistic hubs to integrate solar technology, a feature that was incorporated into its design phase and meticulously executed to ensure significant reduction in carbon footprint alongside its clients.

DNATA Singapore has implemented a 3.5 megawatt-peak rooftop solar power system across its operations, including its cargo and catering facilities at Changi Airport (SIN). This rooftop power plant, consisting of over 6,500 solar panels, will produce more than 4,300 megawatt hours of green energy annually, enabling the company to reduce its ...

In order to achieve its sustainability goals of reducing energy use and emissions, Beni Warehousing Pte Ltd partnered with LYS Energy, a Singapore-based solar Independent Power Producer (IPP) that provides end-to-end solar ...

SP Group is partnering AIMS APAC REIT (AA REIT) to install rooftop solar PV system across six of AA REIT's industrial, logistics and warehouse properties in Singapore by December 2023. The six properties are 20 Gul Way, 27 Penjuru Lane, 30 Tuas West Road, 103 Defu Lane, 8 & 10 Pandan Crescent and 8 Tuas Avenue 20.

Meeting this challenge head-on, we undertook the extensive warehouse facility solar panel installation at absolutely no cost to HAO mart. Keeping the large-scale energy requirements of a mega warehouse system in mind, we designed the 867 kWp solar power system to generate approximately 1,000 MWh of electricity at full capacity.

DNATA Singapore has implemented a 3.5 megawatt-peak rooftop solar power system across its operations, including its cargo and catering facilities at Changi Airport (SIN). This rooftop power plant, consisting of over 6,500 solar panels, ...

We offer a wide selection of solar modules in our database, ensuring we only suggest the finest options. With the increasing size of modules, even for commercial and industrial solar rooftops, we meticulously consider sizing details, prioritizing cost-effective solutions for our clients through optimized solar mounting structures.
