

What are the rebates for installing photovoltaic panels

What is a solar panel rebate?

States, utility companies, and solar panel manufacturers offer rebates that in most cases immediately reduce the cost to install solar panels. Rebates are a dollar-for-dollar reduction in the cost of solar, usually paid directly to installers and passed along as savings to the consumer. Learn more: [Solar panel rebates by state](#)

Where can I get a solar energy rebate?

Utility rebates are offered by electric utility companies to encourage homeowners to install solar panels or other solar energy technologies on their properties. Homeowners can receive these rebates directly from their utility provider.

How does a solar PV rebate work?

For example, if your solar PV system was installed in 2022, installation costs totaled \$18,000, and your state government gave you a one-time rebate of \$1,000 for installing the system, your federal tax credit would be calculated as follows: $\$18,000 \times 0.30 = \$5,400$

How does a utility rebate affect a solar tax credit?

When this is the case, the utility rebate for installing solar is subtracted from your system costs before you calculate your tax credit. For example, if your solar PV system installed in 2022 cost \$18,000, and your utility gave you a one-time rebate of \$1,000 for installing the system, your tax credit would be calculated as follows:

Where can I find solar rebates & tax credits?

You can use the Database of State Incentives for Renewables & Efficiency (DSIRE) to find rebates and state tax credits available in your ZIP code. Some states have a statewide tax credit that you can apply in addition to the federal solar tax credit.

Are solar rebates tax deductible?

Some states have solar rebate programs that offer cash incentives for photovoltaic installations. You can combine solar rebates with the 30% federal tax credit, but there are two important rules to keep in mind: If the solar rebate is from a government agency, the 30% federal tax credit remains unaffected.

This reduction in cost affects the amount of solar tax credits you can receive. For example, if you get a \$1,000 rebate off the cost of a \$20,000 solar installation, your tax credit is based on the reduced \$19,000 amount. At 30%, the tax ...
