

## **What is the name of a locker that can store miscellaneous items**

What is a storage locker?

The purpose of a storage locker is exactly the same as a storage unit. The difference is that a locker is small - or very small! A locker could be 3'x3' with ceilings at an average height or lower. At some storage facilities you might see them so small that two would be stacked on top of each other!

Where can I find a storage unit or storage locker?

Extra Space Storage, with over 2,000 locations in the U.S., is where you can find both storage units and storage lockers. Find a cheap storage location near you!

Do self storage facilities have storage lockers?

Self storage facilities may not have storage lockers with additional amenities. Storage lockers, which may require access via rolling stairs, can make it more difficult to move items in and out. It may be more difficult to find storage lockers at self storage facilities, as they are more common in big cities where space comes at a premium.

What is the main body of a locker called?

The main body of the locker where items are stored is referred to as the storage compartment. It can vary in size depending on the use case. Often rectangular, the overall dimensions and internal shelves depend greatly on the application. The door of the locker provides access to the storage compartment.

Do storage lockers come in different sizes?

Storage lockers come in select sizes. They are ideal for small storage needs and can be more affordable depending on the locker size and available amenities. Storage lockers can be easier to keep organized because they're smaller spaces.
