

Are free solar panels a scam?

If free solar panels sound too good to be true, it's because they are. Solar panels cost money, and these ads are, at best, misleading attempts to push solar leases and, at worst, complete scams. In this article, we'll pull back the curtain on free solar panel claims by comparing solar leases with solar purchase options.

Are 'free' solar panels a good idea?

Companies often offer "free" solar panels through leases or power purchase agreements (PPAs), where they install and maintain the panels at no upfront cost. "Free" solar panels can result in initial savings on your energy bills, but in the long run, the savings may not be as significant as owning your solar panels outright.

Can you get free solar panels from the government?

One of the most common scams are ads showing "How to get free solar panels from the government." While there are government incentives for solar panels, there are only a few extremely niche programs that can entirely cover the cost of going solar, such as California's Low-Income Weatherization Program (LIWP).

Can free solar panels bring you in on a deal of lifetime?

Sunlight is one of the most widely available resources on the planet. With recent investments and advances in solar energy technology, more Americans than ever before can harness the sun's rays and power up their homes and businesses. Riding this historic trend, some are even claiming they can bring you in on a deal of lifetime: free solar panels.

Are solar panels bad for the environment?

At public hearings starting in 2018, some residents said the solar plant would create problems with stormwater runoff, ruin their views and harm property values, as well as the local tourism and agriculture industries. Others falsely claimed solar panels would poison the groundwater and cause cancer.

What do solar companies mean by 'free'?

What Do Solar Companies Mean by 'Free'? When companies advertise free solar, they are generally referring to either a solar lease or solar power purchase agreement (PPA). In both cases, a company installs solar photovoltaic (PV) panels on your home, often with no up-front costs and no money down.
