Where can I compare solar panels in Australia?

At Solar Choice, we're the place to go for an apples to apples comparison of local solar providers in your area. As the best service for solar panel comparisons in Australia, you'll be able to compare solar quotes for a range of different sizes.

How much does a solar panel cost?

It refers to how much electric energy the panels can produce. Panels with higher capacity tend to be more expensive but can generate more power, which might save you more money in the long run. For example, the cost of a single 100-watt panel will be around \$200 - \$500, whereas the cost of a 400-watt panel will be around \$600 to \$1500.

Are solar panels a good investment in Australia?

With now over 3 million solar systems installed in Australia, solar panels are now an affordable investment for most homes. The Australian government also offers an upfront rebate for new solar panel installations along with some state based rebates for solar panels and batteries.

Should you buy cheap solar panels online?

Here are the risks of buying cheap solar panels online: Those bargain panels are likely so cheap because they are not eligible for the solar rebate, meaning your solar system just got \$2,000 - \$4,000 more expensive. Most good installers won't touch cheap online solar panels. Another risk is that the modules may arrive damaged.
