

Who should I go to if I want to install solar power

Should you buy or sell a home with solar power?

If you want to use solar power for your home, your options include buying a system, leasing a system, or signing an agreement to buy solar power. Before you agree to anything, know what you're getting. Depending on the option you choose, you might get certain tax breaks or need to take extra steps before selling your home.

Should I buy or install a solar system?

Purchasing and installing a system that you fully own and maintain is no longer the only option if you want to go solar. Even if you rent your home or don't want to purchase a rooftop system, there are many programs will enable you to still benefit from solar electricity.

Should you choose solar energy for your home?

Before starting the process of powering your home with solar energy, homeowners should investigate their energy use and consider potential efficiency upgrades. Homeowners should be well aware of their total electricity usage, and consider low-cost and easy-to-implement efficiency measures before choosing solar.

How do I choose a solar installer?

Choose a solar installer. An installer can help you determine whether your roof is suitable for solar panels. Begin by researching qualified, insured installers online or asking for recommendations from people who've gone solar. Comparison-shop by asking multiple installers to come assess your roof.

Should I add a solar energy system to my roof?

You may be considering the option of adding a solar energy system to your home's roof or finding another way to harness the sun's energy. While there's no one-size-fits-all solar solution, here are some resources that can help you figure out what's best for you. Consider these questions before you go solar. See the Spanish version [here](#).

How do I choose a solar panel for my home?

Homes with south, southeast, and southwest facing roofs are among the best candidates for solar panels. Finally, homeowners should consider the amount of shade near their roof and how that may impact the amount of sunlight hitting a panel. Factors like trees, neighboring homes, and other tall objects can impact the amount of sun your roof gets.

9. Undersized wires. The minimum wire size for any solar panel installation should be 10 gauge. Thicker wires, including very thick wires, and wires bigger around than your thumb (4/0 gauge) may be required in some ...
