

BiH has significant renewable energy potential, particularly in hydropower and wind power capacity. Hydropower provided 29 percent of the country's total electricity production in 2022 and there is room for additional growth.

KfW Development Bank continues to support Bosnia and Herzegovina in generating electricity from renewable energy sources. This creates alternatives to coal-fired power generation, which dominates Bosnia and Herzegovina's electricity mix.

The Iovik Wind Power Project, located in Livno, Bosnia and Herzegovina, has a total installed capacity of 84 MW and annual on-grid power of around 272 million kWh. With an average ...

VE IVOVIK is the owner of the 84 MW Iovik Wind Farm Project in Livno & Tomislavgrad in Bosnia and Herzegovina. The Project is jointly invested by Power Construction Corporation of China (POWERCHINA) and China General Technology (Group) Holding Co., Ltd (GENERTEC).

Find wind turbine locations in Bosnia and Herzegovina through our Bosnia and Herzegovina wind farm map. Analyze the main characteristics of wind farms in this country, sort these by capacity, number of turbines and landscape area. Discover the largest wind farms in Bosnia and Herzegovina and find wind farms near you.

KfW Development Bank continues to support Bosnia and Herzegovina in generating electricity from renewable energy sources. This creates alternatives to coal-fired power generation, which dominates Bosnia and Herzegovina's ...

Investment possibilities in renewable energy, particularly in wind energy, in Bosnia and Herzegovina (BiH) present several opportunities for state, private funds, companies, or private...

Onshore wind: Potential wind power density (W/m²) is shown in the seven classes used by NREL, measured at a height of 100m. The bar chart shows the distribution of the country's land area in each of these classes compared to the global distribution of wind resources. Areas in the third class or above are considered to be a good wind resource.

Ante Ivkovic herded sheep in Bosnia-Herzegovina with his father as a child. Years later, without his consent or knowledge, he says, a wind farm was built on his property by a Chinese company.

Wind power in Bosnia and Herzegovina. To help us deliver on our ambition to create a more sustainable world to live in, we are keeping the energy flowing in Bosnia and Herzegovina too. Through onshore wind projects,

Wind energy companies in Bosnia and Herzegovina

we are looking to deliver an installed capacity of approximately 650 MW of green electricity.

84 MW Iovik Wind Farm in Livno and Tomislavgrad . HOME; ABOUT US. Profile; ... Our goal. Deepen Sino-BiH cooperation. Project Highlights. Location: Livno & Tomislavgrad, Canton 10, Bosnia and Herzegovina: Capacity: 84MW (20×4.2MW) Generation: 259 GWh annually: CO 2 ... Construction start: August 2022: 0 0 Project location . Clean energy ...

By the end of 2023, an additional 15 concessions for wind-energy projects were issued in Canton 10 -- the biggest canton in Bosnia -- primarily to local owners and companies registered in the region.

Active wind power projects in various stages of development in Bosnia and Herzegovina may add up to 2.2 GW to the country's electricity production capacity, on top of the two existing facilities with an overall 86.6 MW and the two wind farms under construction with a combined 114 MW.

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be ...

The construction of the biggest wind park in Bosnia and Herzegovina, in which Chinese state companies plan to invest EUR130 million, began on Iovik hill near Livno on Thursday. The investment by China ...
