

What is xendee?

XENDEE is the world's most awarded Microgrid Decision Support Platform for certifying the resilience and bankability of distributed energy systems.

How can xendee help the remote communities in Fiji?

“Our software platform will help ensure that the energy systems are meeting the specific needs of each community, promoting efficient and cost-effective energy generation.” SAN DIEGO, March 12, 2024--Xendee has partnered with ASU to bring electricity access and sustainable energy generation to remote communities in Fiji.

What can xendee do for You?

The work has significant potential to uplift communities through economic development, healthcare access, and education opportunities. Xendee was chosen to provide techno-economic and electrical modeling software for this project.

What is xendee's proposal?

Xendee's PROPOSE is a catalog driven proposal tool designed to win deals fast and pass projects to engineers effectively. Propose Solutions-> With DESIGN, quickly model detailed power and thermal flow in your microgrid/DER network together with financial constraints. Design for Optimal Performance->

How long does it take to run xendee?

Operate with Efficiency-> "I can take what normally would include a site walk-through, three months of negotiating with the utility to get the data, and a ten hour modeling exercise, and with Xendee can smash that into just a couple hours.

SAN DIEGO-(BUSINESS WIRE)-Xendee Corporation, provider of the leading design and operation platform for distributed energy systems and Electric Vehicle (EV) fast-charging infrastructure, releases the findings of its 2024 Commercial EV Charging Market Survey, the second in the series of annual research studies. Xendee launched this research survey of ...

NEOM Enters Next Phase of Development with Xendee's Expertise. Xendee Corporation, provider of the leading design and operation platform for distributed energy systems and Electric Vehicle (EV) fast-charging infrastructure, announces the achievement of important milestones in their contract to support NEOM, a visionary development aiming to create a ...

With this report Xendee Corporation and Idaho National Laboratory conclude the first version of the Microgrid Fast Charging Station (MFCS) Design Platform as well as all related tests and validations for two in-depth case studies for islanded and non-islanded operation. ... (INL) with funding by the U.S. Department

of Energy, Office of ...

Xendee develops software that helps planners and investors validate the technical and financial performance of Microgrids with confidence. Our platform enables a broad audience, from business decision makers to scientists working on cutting-edge research.

Xendee Corporation, a leader in microgrid design and decision support software, and Idaho National Laboratory's (INL) Net-Zero Microgrid Program support the Cooperativa Hidroeléctrica de la Montaña to develop and implement an environmentally and financially sustainable zero-carbon microgrid in Puerto Rico. "Increasingly dangerous climate events ...

Xendee Corporation and Idaho National Laboratory have launched a Microgrid Fast Charging Station Designer within the Xendee platform as well as tested and validated it with two in-depth case studies for grid connected and islanded operation. "This project was undertaken to offer a design and validation framework for renewable based Microgrid configurations that ...

Xendee is working alongside other partners, including the Global Green Growth Institute (GGGI), Comet, the Fiji Government, and the US Trade and Development Agency (USTDA), to secure the \$40 ...

For example, within the new phase of work with NEOM, Xendee is now guiding modeling for an Archipelago of more than 10 islands to serve their energy needs completely via innovative and renewable ...

SAN DIEGO--(EIN PRESSWIRE)--Idaho National Laboratory (INL), in partnership with Xendee Corporation and Reilly Associates, has released a new report titled "Small Reactors in Microgrids: Technology Modeling and Selection."The report details a comprehensive model for techno-economic analysis that explores the potential of small ...

Xendee announces the expansion of their support of NEOM, the visionary project aiming to create sustainable cities in the Kingdom of Saudi Arabia. Initial objectives to achieve 100% renewable energy have expanded to include more decentralized and microgrid-based infrastructure. SAN DIEGO--(BUSINESS WIRE)-- Xendee Corporation, provider of the leading design and ...

The NEVI funds program promotes equity and sustainability. Although it doesn't impose specific requirements, Still, the program's goal is to achieve a clean energy future and guide the U.S. towards net-zero emissions. ...

XENDEE Corporation has partnered with Idaho National Laboratory to develop an optimized platform for designing Microgrid Fast Charging Stations (MFCS) quickly and effectively. ... a detailed analysis of two test sites which will act as seed locations for fast-charging facilities across the United States.

Xendee Corporation, provider of the leading design and operation platform for distributed energy and

microgrid systems, ... Use the "Report" link on each comment to let us know of abusive posts. Share with Us. We'd love to hear eyewitness accounts, the history behind an article. Post a comment.

Xendee develops software that helps planners and investors validate the technical and financial performance of Microgrids with confidence. Our platform enables a broad audience, from business decision makers to scientists ...

Brown boobies atop pier posts at Johnston Atoll, September 2005. The United States Minor Outlying Islands is a statistical designation defined by the International Organization for Standardization's ISO 3166-1 code. The entry code is ISO 3166-2:UM. The minor outlying islands and groups of islands comprise eight United States insular areas in the Pacific Ocean (Baker ...

SAN DIEGO--(BUSINESS WIRE)-- Today, Xendee, the world's leading Electric Vehicle (EV) fast-charging and distributed energy system design platform, announced another year of significant growth and achievement in the clean energy and EV infrastructure space. The company released two major new products in 2023, doubled its customer base, and had an ...
