

Does Sunreef Yachts have solar power?

Apart from being equipped with two 360kW engines and a set of 990kWh batteries, this electric catamaran boasts Sunreef Yachts' revolutionary solar power system with panels fully integrated with the composite structures.

Can a yacht be solar-electric?

However, James soon discovered viable options for electric propulsion, and began researching the possibility of converting his new yacht to be solar-electric. The result is the Ramblin' Rose, a catamaran that can haul 12 passengers and sleep up to nine. It also happens to be one of the only solar-electric yachts in the West Coast.

How many servoprop sail drives does a solar-electric yacht have?

The solar-electric yacht now features two OCEANVOLT 15 kW ServoProp sail drives, utilizing unique propeller blades that can change pitch to optimize efficiency and even regenerate power.

Are rigid solar panels a good choice for a yacht?

Rigid solar panels are covered with impact-resistant glass in a metal frame, and often require hardware to install. Over time, the hardware and frame can corrode in unforgiving marine conditions, so it's important to choose one with added weather protection. Solar is well suited to use in yachts.

Why should you buy an electric yacht?

This makes reversing the electric yacht in particular, much easier for captains compared to fixed props built to push forward. The ability to set sail and regenerate power from the propellers is also a huge perk and pairs nicely with the advanced solar panels. Plus, you always have shore power as a backup when you're in a pinch.

Are solar panels a good option for sustainable sailing?

Solar panels have been a good option for sustainable sailing in sunny conditions for some time, being almost maintenance-free and, unlike wind generators, silent. However, maritime conditions are a harsh test for even the best of them due to the incessant exposure they face from saltwater spray and, ironically, ultraviolet (UV) energy.

The solar-electric yacht now features two OCEANVOLT 15 kW ServoProp sail drives, utilizing unique propeller blades that can change pitch to optimize efficiency and even ...

Products within the range include: the FLINrail, a rigid solar panel that can be used while sailing by being hooked onto a boat's guardrails; the FLINstripe, designed to be mounted along a boom's lazy bag using Velcro ...

The new SIXTY SOLAR POWER and the upcoming 40 POWERCAT yachts featured in Multihulls World magazine's "Power Special" ... SOLAR POWER YACHTS. 40 PowerCat. Sixty Solar Power. 52" Exploration. 40" PowerCat - ...

But they're different from those who have raced here since 1904: These nine boats are competing in the Solar Class at the 2021 Monaco Energy Boat Challenge. ... Now, a century later, electric yachts harness ...

The Silent 55 is a new kind of boat which uses solar power via special panels, li-ion batteries and electric motors by Silent-Yachts. This boat sets a new trend in terms of ecologically oriented and careful yachting that ...

The new Sunreef 60 Eco Surreal, is the first 60 foot catamaran that was equipped with in-house developed composite-integrated solar panels built into the yacht's hull sides, superstructure and bimini roof, maximizing ...

The new 80 Sunreef Power is a universal multihull yacht for long cruises in ultimate comfort. Taking luxury and seaworthiness to a new dimension, this dynamic and elegant craft enters the Sunreef Yachts range, redefining the ...

The Sunreef Yachts Eco R& D Team reveals the pictures of the company's in-house developed solar power system. Using ultra-thin, shock resistant and highly-efficient solar cells, it is the industry's first composite ...

By harnessing the power of the sun, this solar electric yacht eliminates the reliance on fossil fuels and significantly reduces carbon emissions. Its successful journey from Brisbane to Gold ...

Apart from being equipped with two 360kW engines and a set of 990kWh batteries, this electric catamaran boasts Sunreef Yachts' revolutionary solar power system with panels fully integrated with the composite structures. ...

Carbon/epoxy sandwich construction reduces vessel weight as much as possible, minimizing propulsion requirements. Catamaran design with flat central deck maximizes available area for solar-cell array. Retractable side ...

The 80 Sunreef Power Eco S&#243;l is an ultra-modern vessel designed for extended offshore cruising, combining comfort and exceptional seaworthiness. Its namesake, S&#243;l, derives from the old Norse word for sun. Its ...
