

Pioneering Solar Pump Provides Year-Round Irrigation Zambia, Honduras, and Nepal. To increase agricultural productivity and improve the livelihoods of smallholder farmers, iDE and has developed a clean energy ...

Special types of surface pumps are: Portable Solar Water Pumps - Portable solar water pumps often irrigate farms, where they reach different areas of the farm. Due to the low weight the pump (and solar panel) can easily be moved around. Solar Pool Pumps - Water in swimming pools needs to be regularly filtered. As this can be relatively ...

In addition Suntech provides solar street lights, solar geysers, solar water pumps, solar fridges etc. With over 25 years of experience our team of qualified experts design tailor made solar-, power back up- and hybrid systems for every ...

Solar pumping is now firmly established as the technology for water supply in remote off-grid applications and also as the costs reduce increasingly for general pumping duties. Dayliff have been leaders in the technology since the birth of the industry and today offer a huge range of options for every solar pumping requirement imaginable.

Our products are employed in various applications like irrigation, domestic, civil construction, dewatering and waste water pumping and solar needs. Another main sector of our portfolio is turnkey and customised solutions to make projects a success in terms of water and sanitation, waste water pumping, Sewage treatment plants, pump house and ...

GRUNDFOS SP Solar systems are carefully selected SP pumps with Solar Controllers specially designed for borehole applications. They are of multistage centrifugal impeller design with all parts made from stainless steel and water lubricated rubber bearings. All SP pumps carry drinking water approval.

Future pumps SE1 & SF2 are robust solar powered irrigation pumps specially designed for small scale agricultural applications using low pressure spray, hoses and drip distribution. They comprise three principal components, the PV solar modules, a specially designed DC motor that is coupled to a flywheel and a positive displacement reciprocating ...

But everything changed for Mukia when he encountered solar-powered submersible pumps. This innovative equipment, powered by solar energy, efficiently extracts water from deep wells, enabling farmers to easily irrigate their fields without relying on expensive fuel or electricity.

Shenzhen Solartech SPM600H permanent magnet solar pumping system was successfully installed in a farm located at Solwezi, Zambia. In the past, the owner needed to drag the diesel pump to the water source for irrigation, which was time-consuming, labor-consuming and extremely inconvenient.

Ideal for agricultural irrigation, livestock watering, and residential water features, this pump combines high performance with sustainable energy use. Product Overview: The Solar Pump Model SPX-3000 is a cutting-edge, eco-friendly water pumping solution designed to harness the power of the sun for efficient and reliable water movement.
