

How does myenergi Zappi work?

The myenergi zappi seamlessly connects your electricity supply to your electric car. Once installed, simply plug in your EV and enjoy hassle-free electric car charging from the comfort of your sofa. Simple, eh! With zappi, you'll also benefit from our clever app that allows you to utilise economy tariffs and boost your charging speed.

What is the myenergi Zappi charging point?

App control The MyEnergi app helps you view and configure charging. It also works with other MyEnergi products MyEnergi's Zappi charging point is a smart EV charger for homes and businesses. It's available in four versions, each of which comes in white or black.

How much does a myenergi Zappi home charger cost?

With this year promising increased supply of EVs, reduced prices and more choice than ever, the future is looking bright for buyers considering a move to electric power. To support the transition, EV buyers currently have the opportunity to purchase a myenergi zappi home charger, including standard installation, for £1,099.

Is myenergi a green technology company?

Pioneering green technology company, myenergi, provides a simple and convenient home charging eco-system that will help to save you money, increase your energy independence and integrate fully with aspirations of a greener future.

Hi I wondered if you are working with Octopus energy to enable the Intelligent octopus service to work with Zappi chargers. I am guessing they are working on only allowing the car to charge in off peak time, and so need additional information to make this happening.

additional support for 3 phase systems, allowing connection of a single phase zappi in a 3-phase 3-wire supply, and to allow the ECO+ mode to be used on a three-phase zappi with all three phases energised. The way i read it, this allows the Zappi 1 to be able to be used with 3-phases, which is not possible.

You should try to get the Zappi v2.1 with Lan/wlan. then the HUB is integrated in the Zappi and you only have to bring the lan with a powerline adapter to the zappi. The only challenge that remains is the Harvi for the ct. This is necessary for the timers! the Harvi is still connected to the zappi at 868mHz. See also here: Communications-Principles

Method: Firstly, install a Myenergi CT clamp around the battery connection and set the Zappi to not drain the battery (Supply Grid -> Network Settings -> Battery -> Avoid Drain); this is the approach

We're simplifying our zappi lineup. Originally, we offered eight zappi variants: four 7kW single-phase units, available with either tethered or untethered cables in black or white, and four 22kW three-phase models, also available in both cable types and colours.

From keeping track of usage to controlling who can access your zappi - OCPP is making eco energy even easier. Find out more about how OCPP gives you more choice, more control, and a better charging experience ...

1 ??&#0183; I updated firmware today and after reboot my zappi can't detect grid and solar. After I connected my EV regardless of the mode it uses full 7kw grid and what worse icon shows that it uses the sun. Absurd. I've been clicking in the menu some settings but can't make it working anymore. Please help P-EV-ZAPPI-2H07TW-7KW V3.162

Hi guys, I have already a Zappi V2 installed. I'm very happy so I thanks creators! I have a question: if I install a second Zappi in my home, I can use the same hub and the same CT to read powers from Solar and Grid? So, i only need the Zappi and I can use all the function like now? Thank you again.

Bei den zappis ist jeweils &quot;Strom Max&quot; auf 15.6A und bei der als Master konfigurierten zappi ist &quot;Netzlimit&quot; auf 50A eingestellt. Soweit also alles prima und jede der beiden zappis funktioniert f&#252;r sich alleine hervorragend. Allerdings m&#246;chte ich die beiden zappis gerne auch mal gleichzeitig mit dynamischem Lastmanagement (mit maximal 11kW ...

The Zappi 2 has been performing happily since the start of the year but has started persistently tripping its breaker after around 30 minutes of charging at 7kW. It does this with both of our cars (a Zoe and e-niro). ... It would be great if someone from Myenergi could chime in here. johnkorr. 12 2. johnkorr. 12 2. Post Sep 30,

3 ???&#0183; I have two 3-phase Zappi V2 on firmware V5.418. The current drawn on each phase is measured by CT"s that are wired into one master Zappi. My Grid/Import current limit is set at 80A (as per my service fuses), so I therefore have ~18kW available to each phase.

Zappi versions that do not have the -T suffix comply with EN 61851-1:2019 with the exception of Clause 8.4 in order to meet the requirements of BS 7671:2018 Amendment 1:2020 which requires the protective earth conductor to be switched in order to provide protection against a damaged PEN conductor in a TN-C-S earthed electrical system
